Subject: RE: Checking In

Hello Arwa,

Good to hear from you and that you are doing well at your new position. I'm also happy that people are reading my UIC ChE group LinkedIn updates!

You are correct that materials engineering is a good area for ChE's, especially advanced materials like semiconductors, alternative energy, biotech. It would be worthwhile to let our students know about this area of industry so that they can tap into it for jobs. With that thought, if you are available and can take time off, it would be great for you to come and talk to the CHE499 senior seminar class about your job in materials engineering. We moved the Professional Development seminar class to the Fall semester this year so it would be some time between Sept-November. Let me know if you are interested. The seniors respond well to recent grads coming to talk to them!

We don't have any summer events planned, but we are planning on having the Chemical Engineering Industry Day Event in the Fall and will be looking for alumni to talk to the students (round-table format).

I will let you know about any other events that might come up, for instance the AIChE student chapter has been thinking about organizing a social event (bbq/picnic?) in the early fall for students/alums. Hopefully that will happen next semester.

Otherwise, enjoying the summer, I hope you are as well!

Regards,

Alan

□

Good morning professor,

Congrats on graduating a new wave of young of ChemE's and I hope they all have exciting opportunities after school. I am just emailing you to check in and see how's everything with you at the ChemE department, I saw some good news on LinkedIn, I like that we are being kept in the loop. My job has been so great so far, Material Engineering is just another option ChemE should consider to pursue if there are limited amount of process engineering positions out there. I am working with the materials group and specifically on adhesives, sealants, and tapes. I am still very surprised by the amount of ChemE's in this industry!!

Any new events are being planned for summer and maybe the fall semester? Please feel free to reach out to me any time..

Enjoy your summer, and I'm looking forward to hearing good news and possibly attending future events at UIC.

Regards,

Arwa Hasan
