

Safety Assignment I: Chemical Engineering Laboratory CHE 381

A Chemical Hygiene Plan (CHP) is an OSHA required safety document at all R&D facilities. A CHP contains useful information on chemical and gas handling, conducting experiments safely in a laboratory setting, employee responsibilities, as well as what to do in an emergency. Employees are required to read the document annually and sign a release form.

ASSIGNMENT: A CHP and 1-page Safety Rules document from a corporate R&D Center have been provided in this Assignment folder (also located in the Safety folder). Please review the documents. You will be responsible for material in the following Chapters: Chapter 1, 3, 2, 4, 5, 6, 7, 8. and the Definitions at the End. You can skip Chapter 2, 3.1 and 3.3 and the Appendices and Attachments.

TAKE THE SAFETY QUIZ: Due Tuesday September 5th at end of lab period. Be brief but concise in your answers. Open book/open notes and team discussion is allowed. Email or provide a hard copy of your completed quiz to the TA's for grading. If you have any questions let me or the TA know. Note: If you download the CHP file, make sure you download the image3.gif file as well.

Safety Assignment II:

SAFETY ASSIGNMENT II: AICHE (American Institute of Chemical Engineers) has created various *safety tutorials covering process safety, risk assessment and chemical reactivity hazards*.

Complete the tutorial titled **“CHEMICAL REACTIVITY HAZARDS”** in the SACHE Certificate Program.

DOWNLOAD PROCEDURE:

1. Go to : <http://www.aiche.org/academy/courses/ela904/sache-certificate-program-chemical-reactivity-hazards>
2. Click “Checkout”
3. Login with your student AICHE username and password; if you logged in with your student member number the price for the tutorial should change to \$0.00
4. Complete Checkout by clicking on “Process my order” and download the tutorial; there will be many files and subdirectories that will be downloaded.

The course is distributed as a zipped file. Once you 'purchase' it, you can find it when you are logged into the AICHE website under the 'academy' link, and then further in "My Stuff". It should be listed there; you can click on it and get into the main menu for the tutorial. From there you can download the file to your computer and then unzip it to extract the files, and then start the course by opening the "index.htm" file.

RUNNING THE TUTORIAL:

1. To access the tutorial double-click on the 'Index.htm' file which will start the tutorial.
2. Follow the directions and answer the sets of questions to move to the next section.
3. When you successfully complete the tutorial **Print the Certificate** stating that you completed the tutorial and email to TA for credit.

COMPLETING THE COURSE:

After studying the material, you must pass the online exam to successfully complete the Safety Certificate. Again, go online to the 'Academy' and Chemical Reactivity Hazards in 'My Stuff' and click "Resume". Click on the Quiz. You may need to disable the pop-up blocker on your browser to allow the link to load. Take the quiz. Once completed you can go back to the main menu in the tutorial and click on "Print Safety Certificate". There is an evaluation as well that you can fill out if you desire.

Note: Once you start the quiz in the popup window, you must navigate away from the page in the main browser or you will not get credit and you will have to take it over again.

GRADING: You must email proof (Certificate issued by SACHE) that you have completed the tutorial and answered the questions for full credit. You can print your Certificate by going to

TRAINING HISTORY under "LEARNING" . It is in the right hand or left hand menu on the tutorial page.
