

CHE 381/382 courses: Fall 2019 and Spring 2020 Self-Study Report

Instructor: Alan Zdunek

Course Comments / Plans

Students comment favorably on the hands-on nature of the lab and how the ‘mini-processes’ mimic actual, large-scale chemical processes and equipment. Based on students suggestions to improve the course; I will; reinstate a peer-evaluation rubric to the grading; provide more information on the theory behind the experiments, both as additional references in BB and possibly as short-chunk, video-lectures; provide more tangible feedback to the team-to-team bi-weekly lab presentations; and update the lab report format.
