

Freshman Engineering Success Program

FALL 2018

Welcome to the College of Engineering!

What is FESP?

The Freshman Engineering Success Program is a program designed to get you motivated about your engineering studies at UIC so that you will have a rewarding and successful experience at UIC. Through a series of sessions and group projects, you will be encouraged to learn more about your engineering discipline and how to build an engineering sense by using your existing math and science skills.

Specifically during the fall semester, you will participate in three weeks of general sessions and 4-6 weeks of major-specific breakout sessions. There will be two team-based mini-projects, a pre-advising session, and a Panel Discussion with UIC engineering alumni.

Who we are:

FESP is a coordinated effort by the six engineering departments at UIC: Bioengineering, Chemical Engineering, Civil & Material Engineering, Computer Science, Electrical and Computer Engineering, and Mechanical & Industrial Engineering. Faculties from each department lead the general sessions and organize the break-out sessions and mini-projects in their respective disciplines. In addition, interaction with junior/senior level teaching assistants is also provided to enhance early experiences and to encourage students to be self-directed in their educational planning process and overall academic success.

FESP Requirements:

Successful completion of the Freshman Engineering Success Program for Fall 2018 is a requirement to pass ENGR100 and to be considered for the Guaranteed Paid Internship Program (GPIP).

You must:

- ▶ Attend all 3 general sessions (held during the 6th, 7th and 8th weeks of ENGR 100).
- ▶ Participate and complete Mini-Project I during the general sessions.
- ▶ Attend all the discipline-specific sessions (determined by your major). These sessions will meet during Weeks 9-14 in different classrooms.
- ▶ Participate and complete Mini-Project II, a technical, hands-on project in your major during Weeks 10-14.

Note: For the purpose of participating in the two Mini-projects, Undeclared Major students will choose a major to be affiliated with for the remainder of the FESP/ENGR100 classes. It is not an official declaration!

FESP SCHEDULE (Weeks 6-14)

Week 6: Welcome and Introductions

- ▶ Assign Mini-project I
- ▶ Students form teams
- ▶ T-shirt contest/ Hand in Google form

Week 7: In-class teamwork, Mini-project I

- ▶ Engineering Survival Tips Video

Week 8: Industry Panel Discussion

- ▶ T-shirt design deadline Friday Oct 19th
- ▶ Mini-project I report Due Friday Oct 19th

Week 9: Pre-Advising Break-out Sessions in your major

Weeks 10-14: Mini-Project II starts; Break-out sessions in your major

- ▶ Hands-on projects
- ▶ Professionalism presentations
- ▶ Other department specific activities

Graduation begins today . . . with the Freshman Engineering Success Program!
