Dear Professor Bilgin,

I am working with Professor Zdunek and several students on increasing our company contacts for Chemical Engineering. At this point in time we are in the information gathering phase attempting to collect and document as many company contacts as possible.

I understand that you are working with company representatives as mentors for Senior Design Project. Would you be comfortable sharing the names of individuals and their companies with me to add to our list? I assure you we will not be distributing this information and will be working with the College of Engineering staff members involved in Advancement and Development in order to follow protocol.

Please let me know if you have any questions or would like additional information before making a decision. I would be happy to come to CEB and meet with you.

Thank-you,

Rose Coppola-Conroy
