

CHE 499 course: Fall 2019 Self-Study Report

Instructor: Alan Zdunek

Course Comments / Plans

Students commented favorably about the diversity of industrial speakers and professional skills presentations. The same format will be kept next year. However, this year's course schedule overlapped with a non-CHE course that some students were taking and caused them to miss a portion of the class period. The department has rescheduled 499 to be at a more acceptable time and day to avoid course overlapping.
