Continuous Improvement Actions:
Based on the assessment, the weakest part of the design projects is environmental and safety analysis. I have been focusing on how to improve that. I attended the Process Safety Faculty Workshop host by AIChE CCPS and BASF. I incorporated materials from this workshop to the course. This year, I am planning to focus on sustainability. I received the Teaching Sustainability Initiative award from UIC and attended a workshop in Summer 2020. I am hoping to transfer my knowledge on sustainability to students in Fall 2020."
