

Quiz 1

Name:

1. What is Newton's equation for momentum transfer?
2. What is the equation for molecular diffusion of mass?
3. What is the physical meaning of ρv , $\rho v v$, and $(1/2)\rho v v v$ in transport phenomena, respectively? (ρ is density and v is fluid velocity)
4. What is the equation for the diffusion in porous solids?
5. What is mass transfer coefficient? what are the units of diffusivity and mass transfer coefficient?
6. What are the driving forces for mass transfer, momentum transfer and heat conduction?
