

Q4: Review of Program Educational Objectives

Periodic review and updating of the PEOs involves all constituencies of the department. The PEOs are discussed by faculty periodically at faculty meetings, with industrial constituents at EAB meetings, Engineering EXPO and ChE Industry Day, with alumni at Engineering Expo, ChE Industry Day, and an online survey, and with students by the Senior Exit Survey and review of SLOs in the ChE courses.

Input from Engineering College administration is obtained from the Office of the Associate Dean for Undergraduate Affairs at regular meetings of the COE Educational Policy Committee (EPC). This provides an avenue for maintaining consistency between departmental PEOs and the UIC and COE mission statements.

The most recent EAB meeting took place on August 14, 2020 and the most recent faculty meeting where the PEOs were reviewed took place on August 3, 2020. The PEOs were considered again but no further changes were deemed necessary. The most recent review of the alumni was through an online survey, with 40 alumni participating. Years from graduation ranged from 1 to 13 years. All PEOs received an average score of greater than 4 using a scale of 1 (lowest) to 5 (highest).

Student Learning Objectives (SLOs) that result from the PEO's are also reviewed in relation to each course by the instructors that have taught the course in the past few years. The last review of the SLOs was done in Summer 2019.
