Topic: Mapping of ABET Student Learning Outcomes to ChE 201

Course Number	CHE 201
Faculty Name	Betul Bilgin /Alan Zdunek

Please review and update if necessary the following course contributions taken from 2014 that have been mapped to the new ABET student outcomes (1) to (7). Each outcome should only have one contribution of: (1) Not Covered, (2) Introduced, (3) Reinforced, (4) Emphasized

Student Learning Outcome	1	2	3	4
(1) an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.			X	
(2) an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.		X		
(3) an ability to communicate effectively with a range of audiences.		X		
(4) an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.		X		
(5) an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.		X		
(6) an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.	X			
(7) an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.		X		

(1) Not Covered: Topic not covered specifically in the course

(2) Introduced: Students are not expected to be familiar with the content or skill at this level. Instructions and learning activities focus on basic level of knowledge.

(3) Reinforced: students have been introduced before to the content or skill. Instructions and learning activities continue to build upon previous competencies with increased complexity.

(4) Emphasized: Students are expected to possess an advanced level of knowledge, skill, or competency at this level. Students are asked to demonstrate their learning on the outcome through homework, projects, tests, etc and are provided a feedback for continuous improvement.
