

Q5: Clarification of Chemistry Courses in Transcripts

General Chemistry sequence (CHEM 122/123, 124/125) and equivalence of CHEM 112, 114, 116 and 118:

1) The Chemistry department changed the General Chemistry I and II lecture/lab courses (CHEM 112 and CHEM 114) to CHEM 122/123 and CHEM 124/125 in 2016 to separate the lecture and lab parts of each class. The courses are equivalent and have the same amount of total credit hours (5 credit hours) as the older courses. The only change made was to split the total hours between the lecture (4 cr hr) and lab (1 cr hr). I have included documentation to support the changes (attached).

2) CHEM 116 and CHEM 118 are the Honors and Chemistry Majors General and Analytical Chemistry courses I and II. The chemical engineering students that are in the Honors College take CHEM 116 and CHEM 118 instead of CHEM 122/123, CHEM 124/125. The courses are equivalent and are shown in our BS Degree NonEngineering and General Education requirements on our website:
